REEF downlight

REEF asymmetric downlight

Reef LED

REEF delivers modern styling combined with performance, economy and adaptability with a simple yet effective polished reflector and optical diffuser system.

Providing an excellent efficacy of up to 102 lm/W, **REEF** is ideal for replacing old CFL, or new LED lighting installations. Opting for the DALI LED driver option allows you to precisely manage your lighting according to need using automated control and further increase savings potential as well as comfort.

Offering lumen outputs ranging from 1300 lm - 3450 lm, asymmetric options and CCTs of 3000K/ 4000K across three sizes (165mm, 215mm and 265mm) there is an ideal option for most applications.

REEF is of steel and aluminium construction and has a tested LED lifetime of 50,000 hours/L80 .

Optional protective covers also available to provide higher IP40/IP44 ratings.
