## Spin LED pendant

Spin, the new miniature LED pendant from Arkoslight, has already been awarded with the Gold A'Design Award 2015 and the German Design Award Nominee 2016.

The pendant, entirely manufactured in aluminium, is available in black or white texturized finishes and uses ultra thin, braided transparent cable and a recessed ceiling disc to ensure the pendant itself remains the focal point.

The whole piece acts as a heat sink, so the 7watt LED is always maintained at its optimal working temperature. Spin includes an optic that perfectly controls light distribution at a very defined angle and prevents glare.

A surface mount base is offered for ceilings that do not allow for recessing. Spin also has additional cable attachment points for looped suspension.

## Blazer

36watt LED ceiling light, ideal for use in offices, meeting rooms, showrooms, libraries or schools.

Providing an incredibly low UGR (glare rating) <16, a micro louvre ensures compatibility to office lighting regulations and the microprismatic diffuser provides IP40 coverage and allows easy cleaning.

### Features:

- recessed / surfaced / suspended mounting options
- sizes: 300 x 300 / 300 x 600 / 300 x 1200 / 600 x 600 / 600 x 1200
- CCTs of 3000k / 4000k / 2700k / 5000k / 6500k
- electronic control gear (DALI dimmable on request)
- CRI 80+Ra (90+ on request)
- 50,000 hrs / L80

## Can downlights

An excellent source of ambient lighting, flush mount ceiling lights are both functional and decorative.

Low profile surface mounted down-lights are perfect for lower ceiling height applications or for highlighting features with the ability to change the beam spread via variable apertures.

Available in a wide range of shapes, sizes and materials and suitable for most light sources, this type of down-light provides high efficiency low glare light, free from hot spots.

## Kardinia College Senior Centre

Sonic Lighting was proud to design and supply the lighting for Kardinia International College's newly opened Senior Centre and Learning Commons.
