## SWAP downlight

SWAP is the new recessed LED downlight by Arkoslight, designed to replace recessed MR16 luminaires with obsolete halogen light sources for this modern, economical and efficient designer product with LED technology.

Thanks to a unique modular design, SWAP can be adapted to suit any fitting hole diameter from 62mm to 101mm. To this end, three sizes have been designed which all include a ring accessory for enlarging the bezel diameter as necessary. This enables a single SWAP fitting to cover a range of hole diameters whilst maintaining its attractive minimalist aesthetic.

With features and a performance superior to any retrofit alternative, no need for repainting or adjustments to the ceiling and a simple, tool-free installation thanks to an easy clip system, SWAP is a low-glare, elegant stand-out in the LED downlight market.

## POULTER downlight

With 56 different variants, POULTER is the most flexible downlight on the market in terms of its ability to fit need. Various combinations of reflector and diffuser in sizes S, M or L can tailor POULTER to your specific application, with the option of further customisation available on request.

POULTER delivers discreet styling, wattages 15w - 33w, an efficacy of up to 104 lm/W, lumen outputs from 1150lm - 3300lm and colour temperatures of 3000K or 4000K, making it possible to choose the very best on even the tightest budget.

The full metal housing means you can rely on the construction of POULTER to live up to its great lifetime of 55,000 hours/ L80 (S/M versions) and 50,000/ L80 (L version)

- 3H emergency kits available in all variants
- IP40 or IP54 protection covers
- ambient temperatures of -5°C to +35°C (S) and -20°C to +35°C (M/L)

## Santa & Cole visit

We were delighted to have a visit from Jordi Nadal and Josep Ma Serra from one of our favourite suppliers [Santa & Cole](#) at the end of last year.

Amongst the new products unveiled, we were also treated to a preview of some of the new ['golden collection'](#) products.
