## Fox/Minifox LED

FOX LED is the latest update from Arkoslight, featuring a corrosion resistant polycarbonate body and diffuser, with a frame so slim it almost appears trimless when illuminated.

Its most outstanding technical features include a low recess depth, homogenous distribution, remarkable efficiency and a unique 'bayonet style' diffuser system. The design of its heat sink achieves excellent thermal management while enabling Fox LED to achieve a high lumen value at reduced power consumption.

The FOX is available in 15W or 20W, dimmable with push, 1-10V or Dali protocols and in 3000k or 4000k.

FOX and FOX MINI also boast an IP54 protection level against the penetration of solid and liquid particles and an IK10 level (the highest level) of impact resistance.

## AVANT LED

The AVANT is a premium quality LED profile with a professional looking finish. A custom-made linear light, AVANT has been designed to incorporate the latest LED technology with a high quality lighting system, providing maximum light.

Producing elegantly diffused light, the LED boards smoothly interconnect to provide a seamless finish, even when creating joints. Screwless end caps create a clean and less industrial aesthetic appearance.

The AVANT profile has been specifically designed to disperse the heat generated from the LEDs evenly over the entire body, increasing the efficiency and longevity of the LEDs. With a lifetime of 50,000hrs/L70 and systems producing over 108Lm/W (compared to 85Lm/W for T5), the AVANT offers a 12% increase in Lumen output from the light source.

Custom manufacturing allows for flexibility in length, with black / white / anodized colour finishes, opal / frosted reeded diffusers, varied mounting options, 3k / 4k CCT, standard / high output LED and up/down lighting capabilities.

[Recessed](#), [wall](#) or [ceiling surface mount](#) and [suspended](#) versions available.

## Diana lamps

The Diana range of lamps features a slender central metal stem supporting a slightly conical wide circular linen shade with upper diffuser. The [Diana](#) and [Diana Mayor](#) floor lamps and the [Diana](#) and [Diana Menor](#) table lamps all retain the simplicity that characterize this family.

Available in satin nickel or polished brass finish, the metallic structures include an in-line dimmer. Shades come in black or white linen (black with stone cardboard diffuser, white with translucent white cardboard diffuser).

## Mulgrave Country Club

We recently supplied these unique pendants to Mulgrave Country Club. The custom designed size and colour give a real 'wow' factor, and an internal opal diffuser softens the light to suit the dining area.
