[NEW LOOK WEBSITE](#)

Visit our re-launched website and see our new, updated look.

The comprehensive architectural lighting ranges we offer provide both creative and technical solutions to projects of any scale and we have many more products from our international partners available upon request.

Fully responsive, mobile friendly, fast and functional - we hope you enjoy the all new look: www.soniclighting.com.au

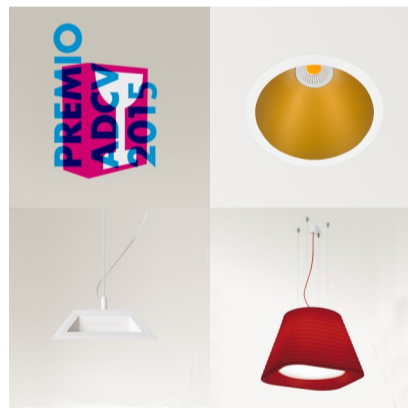

[SLEEPER LINE](#)

The [SLEEPER LINE LED](#) lighting system is designed for horizontal or vertical line installation. With options to ceiling recess, surface mount on ceiling or wall or suspend (continuous installation), the SLEEPER LINE offers 28W / 35W / 70W modules in 3000k or 4000k.

The natural anodised aluminum extrusion with an opal polycarbonate diffuser provides low glare levels and a homogenous light distribution.

The profile comes in 1m and 2m lengths for individual or continuous installation and is also available in custom lengths.

[ARKOSLIGHT AWARDS](#)

Arkoslight's [Swap](#), [Slimgot](#) and [Brigit](#) luminaries have been selected among the best industrial designs at the **ADCV awards** (Community of Valencia Association of Designers). The three pieces achieved this acknowledgement for their design quality, placing them among the most outstanding in Valencian industrial creation in recent years.

[Spin](#) and [Thor](#) have also both been awarded with the **Iconic Awards: Interior Innovation**. This honour, awarded by the German Design Council, is considered to be one of the most important and prestigious events in the world. The Iconic Awards are given to the best contract channel and interior design products for architecture.

This new acknowledgement for Spin and Thor reaffirm the excellence of the company's products and become part of the 28 accolades and awards received by Arkoslight's luminaries in the last four years.
